

dbTimeSeriesProcessor
::getFirstTime

dbTimeSeriesProcessor
::getLastTime

dbAnyCursor::setSelection
Limit

```
graph LR; A[dbTimeSeriesProcessor::getFirstTime] --> C[dbAnyCursor::setSelection Limit]; B[dbTimeSeriesProcessor::getLastTime] --> C;
```

The diagram illustrates two separate calls to the `dbAnyCursor::setSelection Limit` method. On the left, two white rectangular boxes represent the calling methods: `dbTimeSeriesProcessor::getFirstTime` (top) and `dbTimeSeriesProcessor::getLastTime` (bottom). On the right, a gray rectangular box represents the target method: `dbAnyCursor::setSelection Limit`. Two blue arrows originate from the right side of the white boxes and point towards the left side of the gray box, indicating the direction of the calls.
